## CerTest

### AUTOMATED CERTIFICATION AND TESTING PROGRAM

This letter outlines the policy and procedures for the CerTest program as it applies to program management and use.

**1. General Information:** CerTest is an interactive computer-based program designed to test, evaluate, and certify a student's knowledge of principles and procedures on various job-related subjects. CerTest is a "one-stop-shopping" system for evaluating subject and task knowledge.

a. Users Guide Information. There is no longer a paper-based "Users Guide" for CerTest. All program documentation and help for the Windows® version of CerTest is now on-line. If you're not sure how to do something in this version of CerTest once it's installed on your computer, use the *Help* pull-down menu to receive information or instructions on the topic you need help with.

b. The CerTest Procedural Guide for Operations may be accessed from the main menu. An icon for the Procedural Guide is also provided on the main tool bar. The Procedural Guide is a Word document that can be viewed on-line or printed locally. Each base should print a complete copy of this document. All CerTest program managers and test proctors are responsible for adhering to the guidelines in the Procedural Guide.

**2. CerTest Management:** CerTest may be installed on more than one computer; however, computers must be located so a CerTest manager can control testing. It is recommended that these computers be located in a centralized Learning Resource Center (LRC). CerTest can be installed on computers that have other programs loaded on the hard drive.

a. To maintain integrity, and prevent test compromises, each Operations flight will assign **no more than three** individuals as CerTest program managers with **lock/unlock test privileges**. You may assign additional program managers to perform other management functions such as view/print student records, collect statistical data, print reports, etc. The CerTest program should be maintained like other official testing programs (See your service specific regulations for requirements).

b. CerTest program managers are responsible for proctoring tests, test administration, program security, and compliance with these instructions. The DoD OPR may periodically visit and inspect test sites to ensure compliance.

### 3. Manager Responsibilities:

**NOTE:** The Unit Training Manager will usually serve as the CerTest Manager (CTM). Consider selecting a CerTest Training/Evaluation Team with the following members: Two assistant managers, one subject matter expert (SME) from each specialty, a fire department liaison, and a computer systems (LAN/WAN) specialist.

- a. Ensure program procedures are followed as outlined in this management guide.
- b. Monitor and proctor student testing, as required (see para 4).
- c. Perform required program maintenance (see para 5).
- d. Evaluate performance records.
- e. Provide OJT trainers and certifiers access to CerTest to create site-specific tests.
- f. Import/export student files between sites (see section 12).
- g. Back-up student records and site specific tests at least weekly.
- h. If your base or installation is closing, return all instructional materials and program diskettes to the DoD OPR NLT 90 days prior to closure.
- i. Coordinate question challenges and forward them to the DoD Administration Center as required.

**4. Test Proctor Responsibilities:** There may be instances where someone besides a CerTest Program Manager is required to proctor a test. A CerTest proctor's responsibilities occur during and immediately after each test administration. However, a proctor's responsibilities are no less important than the program manager's responsibilities.

a. Not only is a test proctor responsible for monitoring students taking all **AF Qualification Training Package (AFQTP)**, **CFCs/HCFCs** certification tests, he/she must also ensure these tests are not compromised in any way. This means making sure students do not have access to reference materials during the test, do not receive any assistance during the test, but are given enough time to take a test.

**WARNING:** CerTest contains an "auto-shut-off" mode. After **5 minutes** of inactivity, CerTest will automatically score the test and exit. Whatever questions the student missed will be scored as an incorrect response.

b. A CFC/HCFC proctor's responsibility is so critical that each proctor is required to complete the proctor authentication statement on each student's record test summary to verify that the proctor has complied with these and other guidelines contained in this Procedural Guide.

**5. Program Maintenance and Security:** To enhance program maintenance and most importantly test security, several changes software changes were made. The following changes were made.

a. CerTest is shipped to each base on CD-ROM only. CerTest can be ran by loading the program in one of three ways (directly onto your hard drive, on a local area network, or by using the CD). After installing or using the program the CD must be secured. If a program compromise is suspected, contact the DoD OPR.

b. No more than three managers will have access to locking/unlocking tests for students in CerTest 3.0. All other managers may log-on to CerTest, build tests, and view student records, but will not be allowed to lock/unlock tests.

**6. Equipment and Material Required to Support the CerTest Program:** Hardware and software upgrade requirements for CerTest have remained at a conservative pace to maximize participation. Commanders should be advised that CerTest is no longer an “optional” or supplemental OJT system. Mandatory upgrade requirements (e.g. QTP tests) have been tied to this platform and future plans call for more compulsory usage in OJT. Familiarization with CerTest will be critical for all trainees enrolled in CDCs.

a. CerTest requires a minimum 486 PC (Pentium recommended) with at least 4 Megabytes (8 recommended) of Ram, MS-Windows® 3.1 (Windows '97 recommended) or higher, a VGA/SVGA color monitor, and printer. The following hard drive space must be available before installing CerTest:

Function	Required Memory
To run tests from CD	6 Megabytes
To load CerTest Operations (CE Craftsman)	58 Megabytes
To load CerTest for Fire Protection/Readiness	26 Megabytes
To load Operations and Fire Protection/Readiness	73 Megabytes

b. **Installation Strategy:** If you currently do not have computer systems with a CD-ROM drive, you can still load the program on each of your computer systems using an external CD-ROM drive. Check with your local computer support section to see if they have one you can use or make arrangements to purchase one or more.

**7. Learning Resource Centers (LRCs):** The space and physical facilities selected for computer-based testing must be conducive to continuous surveillance by a test proctor during testing. Test proctors must ensure conditions are favorable for testing such as proper lighting, temperature, and freedom from distractions. A centralized testing facility is recommended for controlling the CerTest program. The test proctor must be able to monitor all computers at one time while official (CFC/HCF) testing is in progress. When an LRC is used for CerTest it will be similar (with some exceptions) to requirements of a base test control facility (TCF).

**8. Testing:** The interactive computer portion of the program is used for testing only. CerTest contains various tests: Pretests, Posttests, Demo tests, Site tests, AFQTP tests, etc. With the exception of site tests, “practice-test-taking” or test reviewing is prohibited. Personnel will not compromise any test by discussing or copying tests. The 3.0 version of CerTest will include volume review exercises and a comprehensive final test for each specialty. Supervisors are strongly encouraged to have each trainee take these tests (as a “pre-evaluation” tool) prior to taking their official CDC end-of-course exam.

a. Students should be prepared to sit through a test until the test is completed. Once testing has started, an entry must be made every five minutes; otherwise, the computer program will terminate the test and the student’s score for the entire test will be recorded.

b. Once the student completes a test, the test summary screen should be printed and placed into the student’s training record. If a student fails a test, a copy of the test summary showing which areas of instruction require additional study should be given to the student.

**NOTE:** If a copy of the test summary is needed at a later date, it can be recalled by entering into the Student Record and selecting the “*Detail*” option under the View menu or by double clicking on the Stat, Score, Date, or Attempts block for that test.

**9. Test Failures Other Than CFC/HCFC:** Test failure procedures should be addressed at the Base CE level. Other than the CFC/HCFC approved certification test, all test are used for evaluating subject and task knowledge.

**10. Statistical Data Collection:** Each time a CerTest test is taken, the program automatically collects statistical data that is used to validate the test. This information must be submitted to the DoD Administration Center. Each time the CerTest program manager receives a “collect statistical data” message on the computer screen, please complete the following:

**To Collect Statistical Data:** Select the “*Statistical Data Utilities*” option found in the File menu of CerTest and follow the directions on the screen. **Note:** A separate disk must be used for each computer.

**11. Challenging a Question:** Anyone may challenge a CerTest test question. While taking a test, a student may find a question that he/she believes to be erroneous or invalid for some reason (i.e., typo, spelling mistake, missing graphic, ambiguous question, etc.). The student may challenge the question by clicking the hand icon on the toolbar, or by selecting “Challenge This Question” from the Help menu. This allows the student to type a short description of the error. You may view, print, or download some or all of these Question Challenges.

**12. Transferring Student Records Between Bases:** When a person leaves your base, they should “hand carry” a disk copy and a hard copy of their CerTest training records to their new base. The CerTest program manager can copy a student’s record to a diskette (recommend 3 ½” diskettes) using the “*Copy to Diskette*” option found in the File menu of CerTest. Include any additional records (paper) that shows completed training. The base from which the student has departed will maintain the student’s records for at least 120 days before deleting it from the computer system.

**13. CerTest Instructional Materials:** Program managers must establish a CerTest library. Instructional materials can be used for group or individual training.

**14. Program Errors:** If a program error occurs, write down the information exactly as it appears on the computer screen, then contact the CerTest Program Manager for Operations, MSgt Ron Brown, HQ AFCESA, DSN: 523 6380; or the Technical Assistant Branch at DSN 736 5805.

**15. CFC/HCFC Certification and Testing:** The Environmental Protection Agency (EPA) mandated effective November 14, 1994, persons that maintain, service, or repair refrigeration and air conditioning systems containing chlorofluorocarbons (CFC) and/or hydrochlorofluorocarbons (HCFC) must be certified by an approved certification program. In February 1994, EPA approved the 366TRS/TTM, Sheppard AFB TX (Air Force Civil Engineer Technical Training School) to be the DOD CFC Certifying Agent.

a. There are four types of certification; all Air Force Civil Engineers will be certified to the Universal Technician Level.

Type I (household appliances)

Type II (high pressure systems)

Type III (low pressure systems)

Universal Technician (encompasses all types)

b. If you wish to load the chlorofluorocarbons (CFC)and/or hydrochlorofluorocarbons (HCFC) Certification tests and DO NOT already have them on your system(s), complete the installation, then enter CerTest and select Enable Secure Tests available under the File pull down menu. You will have to call the appropriate point of contact displayed on the Enable Secure Test Groups screen to obtain the appropriate Enable Code.

c. All CerTest CFC/HCFC proctors must be designated in writing. This appointment letter must include a statement that states they have read and understand all CerTest program requirements listed in this CerTest Procedural Guide. A copy of this letter must be forwarded to the DoD Administration Center and an info copy must be forwarded to your command or service component representative. The letter should be formatted and contain the information included in this sample:

**DEPARTMENT OF THE AIR FORCE**  
**ANY CE SQUADRON, (MAJCOM)**  
**ANYBASE AIR FORCE BASE, ANYWHERE**

MEMORANDUM FOR 366 TRS/TTM (CFC/HCFC))

727 Missile Road  
Sheppard AFB, TX 76311-2254  
ATTN: Mr. Ron Lawson

FROM: XXX CES/CCQT

1111 Anystreet, Suite 10  
Anybase, Anywhere 11111-0001

SUBJECT: CERTEST Proctors

1. As requested, this letter identifies the CFC/HCFC Proctor for the Any CES at Anybase AFB, Anywhere.
2. All proctors, by signing this letter, state that they have read and fully understand all CerTest program requirements listed in the CerTest Procedural Guide. Not following the procedures listed for CFC/HCFC testing is in violation of Environmental Protection Agency Guidelines and is punishable by federal law.

<u>NAME</u>	<u>RANK</u>	<u>SSAN</u>	<u>ADDRESS</u>	<u>DSN</u>	<u>SIGNATURE</u>
-------------	-------------	-------------	----------------	------------	------------------

CE COMMANDERS SIGNATURE

d. Test Administration. The CFC Certification program has a **Universal Pretest** and **Posttests** for each level. At least one CerTest program manager will proctor personnel testing. The examinee will need their own Pressure Temperature Chart and calculator while testing. No other study materials will be allowed in the test room/area.

e. **BEFORE ADMINISTERING A TEST:** Verify the identity of individuals taking CFC certification tests by examining photo identification. Acceptable identification includes, but are not limited to drivers' licenses, government identification cards, or passports.

f. Examinees should be prepared to sit through a test until complete. Only the examinee testing will be allowed at a **computer** while testing is in progress. Personnel are not allowed to take "practice tests" or review any tests. Once testing has started, an entry must be made every five minutes; otherwise, the computer program will terminate the test and a "failed" score will be recorded.

g. **Pretest:** It's recommended that personnel take the pretest before taking any certification tests. The Pretest are at the back of the CFC StudyGuide/Workbook.

h. **Posttest:** All examinees must take the Core Test before taking any other tests. **Only one CFC Test should be unlocked at a time.**

i. **Test Failures:** If an examinee fails a test, give them a copy of the "test summary" (shows areas of instruction requiring additional training). Anyone failing a test should have supervised, remedial training. After remedial training has been completed, retest the examinee. If the examinee again fails the test, the commander should be notified and appropriate action taken.

j. **Record Keeping:** Once an examinee passes their required level of certification (AF Civil Engineers must be Universal certified), print two copies of the "student record". Test proctors must provide the following information on both copies: Name, SSAN, signature, and verification statement that the Certification level is correct. Put one copy of the "student record" in the examinees training/personnel folder. The other copy will be sent to the DoD Administration Center along with the statistical data and student record downloaded to a 3 1/2" disk.

k. Use the File pull down menu and "*Copy to Diskette*", and "*Statistical Data Utilities*" to download the student record and statistical data. Follow the directions on the screen. Send the 3 1/2 " disk, the printed student record, and a return 3-line address:

123 CES/CE  
56 FLIGHT AVE.  
ANYWHERE AFB TX 74201

If a copy of the test summary is needed at a later date, it can be recalled by entering into the Student Record section and selection "DETAIL". The computer program will retain this information for 90 days from the test date before its automatically deleted..

**16. CerTest Points of Contact:** Base-level CerTest program managers should contact a DoD CerTest program manager if assistance is needed.

a. The DoD Administration Center for the CFC/HCFC Program is:

**Mr Ron Lawson, 366 TRS/ TTM (CFC/HCFC) 727 Missile Rd. Sheppard AFB, TX 76311-2254; DSN: 736-5793/5809 ; Commercial (940) 676-5793/5809; FAX: 736-2768; Commercial (940) 676-2768; e-mail: [ron.lawson@sheppard.af.mil](mailto:ron.lawson@sheppard.af.mil)**

b. The DoD/Air Force Fire OPR for CerTest is:

**CMSgt Jim Podolske, 139 Barnes Drive, Suite 1, Tyndall AFB, FL 32403 DSN: 523-6321; Commercial (850) 283-6321; FAX: 523-6390; Commercial (850) 283-6390; e-mail: [jim.podolske@tyndall.af.mil](mailto:jim.podolske@tyndall.af.mil), Web Site – [www.afcesa.af.mil](http://www.afcesa.af.mil)**

c. The DoD/Air Force Operational OPR for CerTest is: **MSgt Ron Brown, 139 Barnes Drive, Suite 1, Tyndall AFB, FL 32403 DSN: 523-6380; Commercial (850) 283-6380; FAX: 523-6488; Commercial (850) 283-6488; e-mail: [ronald.brown@tyndall.af.mil](mailto:ronald.brown@tyndall.af.mil), Web Site – [www.afcesa.af.mil](http://www.afcesa.af.mil)**

**17. Reference Material:** Attachment 3 lists the tests that have been included in the CerTest program and also identifies the videotapes, training manuals, and CDC courses that were used to develop these tests. Although CerTest has a powerful spell checker, a dictionary may be used.

**18. Student/Instructor Guides.** Student and Instructor study guides can be purchased for videotapes obtained from the Army Visual Information Center and Williams Learning Network. For the latest cost of the guides, contact Williams Learning Network:

**Special Note:** NUS was purchased by Williams Learning Network. Any correspondence dealing with NUS should now be directed to Williams Learning Network.

Boiler Water Treatment	802771DF
Raw Water Treatment	802772DE
Ion Exchange	802773DF
Cooling Water Treatment	802774DF
Pavement Maintenance, Repair and Inspection Seminar Videotape Progm	610276DF
Introduction to Pavement Fundamentals (Included in above set)	
Rigid Distresses (Included in above set)	
Pavement Maintenance and Repair 1 (Included in above set)	
Pavement Maintenance and Repair 2 (Included in above set)	
Pavement Maintenance and Repair 3 (Included in above set)	
Flexible Pavement Distresses 1 (Included in above set)	
Flexible Pavement Distresses 2 (Included in above set)	
Flexible Pavement Distresses 3 (Included in above set)	
Soil Fundamentals and Stabilization 1 (Included in above set)	
Soil Fundamentals and Stabilization 2 (Included in above set)	

Soil Fundamentals and Stabilization 3 (Included in above set)  
New Technology (Included in above set)  
Pavement Management System 1 (Included in above set)  
Pavement Management System 2 (Included in above set)  
Pavement Management System 3 (Included in above set)  
Pavement Management System 4 (Included in above set)

## 20. Training Areas:

Civil Engineering General
Carpentry
Contingency
Controls
Electronics
Ground Maintenance
Heating
High Voltage Distribution
Low Voltage Electric
Pavements
Piping & Systems
Power Generation
Refrigeration
Sheet Metal
Water Treatment
Welding

### **Air Force Career Fields (AFSCs)**

Electrical Systems
Electrical Power Production
Heating, Ventilation, AC & Refrigeration (HVAC/R)
Pavements & Construction Equipment Operators
Structural
Engineering
Operations Management
Environmental Controls
Utilities Systems
Liquid Fuels System Maintenance
Demonstrations

TPC	- TPC Training Corporation	1 800 837 8872
WLN	- Williams Learning Network	1 800 969 8754
HT	- HomeTime	1 800 469 9955

## ELECTRICAL SYSTEMS

<u>Test No</u>	<u>Tape Title</u>	<u>Source</u>
<u>CE GENERAL</u>		
819	Hand Tools 1	AVIC
820	Hand Tools 2	AVIC
821	Measurement Tools 1	AVIC
822	Measurement Tools 2	AVIC
823	Power Tools	AVIC
838	Fire Safety	AVIC
839	Hazardous Substances	AVIC
<u>LOW VOLTAGE</u>		
751	Fundamentals of Electricity I	AVIC
752	Fundamentals of Electricity 2	AVIC
897	DC Fundamentals Review	AVIC
899	Electromagnetic Induction Review	AVIC
900	Safety in Electrical Maintenance	AVIC
901	Using Electrical Test Equipment	AVIC
902	Reading Electrical Diagrams 1	AVIC
903	Reading Electrical Diagrams 2	AVIC
904	Troubleshooting & Emergency Repair of DC Systems & Equipment	AVIC
905	Troubleshooting & Emergency Repair of AC Systems & Equipment	AVIC
906	AC Generators Maintenance	AVIC
907	DC Generators Maintenance	AVIC
908	DC Motor Maintenance	AVIC
909	DC Motor Controller Maintenance 1	AVIC
910	DC Motor Controller Maintenance 2	AVIC
911	Single Phase AC Motor Maintenance	AVIC
912	Three Phase AC Motor Maintenance	AVIC
913	AC Motor Controller Maintenance 1	AVIC
914	AC Motor Controller Maintenance 2	AVIC
916	Motor Branch Circuit Protection	AVIC
917	Transformer Maintenance	AVIC
918	Maintenance of Low Voltage Circuit Breakers and Switchgear	AVIC
919	Maintenance of High Voltage Circuit	AVIC

	Breakers and Switchgear	
920	Storage Batteries and Chargers	AVIC
921	Cables and Conductors, Splices and Terminations 1	AVIC
922	Cables and Conductors, Splices and Terminations 2	AVIC
923	Conduit Installation	AVIC

#### HIGH VOLTAGE DISTRIBUTION

130	Overhead Distribution Systems	WLN
131	Distribution Line Safety	WLN
132	Transformers 1	WLN
133	Transformers 2	WLN
134	Transformer Connections I	WLN
135	Transformer Connections 2	WLN
136	Transformer Troubleshooting	WLN
137	Pole Top Transformer Replacement	WLN
138	Climbing Wooden Poles	WLN
139	Care/Testing of Tools & Equipment	WLN
140	Working on Distribution Poles	WLN
141	Safety in Overhead Line Maint	WLN
142	Pole Top Equipment & Replacement 1	WLN
143	Pole Top Equipment & Replacement 2	WLN
144	Troubleshooting Overhead Lines	WLN
145	Safety in Substation & Switchgear	WLN
146	Substation & Switchyard Maintenance	WLN
147	Safety in Transmission and Distribution Maintenance	WLN
148	Distrib Line Repair (Gloves)	WLN
149	Distrib Line Repair (Hot Sticks)	WLN
150	Voltage Regulators	WLN
151	Circuit Breakers 1	WLN
152	Circuit Breakers 2	WLN
153	Relays 1	WLN
154	Relays 2	WLN
155	Cable Fault Location 1	WLN
156	Cable Fault Location 2	WLN
157	Pad Mounted Transfer & Switchgear	WLN
158	Safety-Underground Line Maintenance	WLN
159	Bucket Trucks I	WLN
160	Bucket Trucks 2	WLN
161	High Voltage AC Power I	WLN

162	High Voltage AC Power 2	WLN
163	Series Street Lighting Systems	WLN
164	Multiple Street Lighting Systems	WLN

#### ELECTRONICS

866	Basic Electronics Unit 1	AVIC
867	Basic Electronics Unit 2	AVIC

#### CONTINGENCY

203	Field Sanitation & Hygiene	AFAV
204	Desert Survival	AFAV
205	Cold Weather Survival	AFAV
206	Explosive Ordnance Reconnaissance	AFAV
210	Resource Dispersal	AFAV
212	RRR Philosophy	AFAV
214	Base Denial	AFAV
257	Spall Repair	AFAV
264	Command and Control	AFAV
267	Auxiliary Firefighting	AFAV

### **SUPPLEMENTAL TRAINING - supplements STS/OJT training requirements**

#### CE GENERAL

728	Powers, Root, and Mathematics	AVIC
729	Algebra and Formulas	AVIC
730	Algebra and Graphs	AVIC
731	Fundamentals of Math	AVIC
732	Using Formulas	AVIC
733	Graphs, Charts, and Tables	AVIC
951	Common Home Repairs	HT
952	Contracting a Home 1	HT
953	Contracting a Home 2	HT
954	Home Evaluation	HT
955	Preventative Home Maintenance	HT

#### ELECTRONICS

868	Power Supplies	AVIC
869	Transistor Principles	AVIC
870	Transistor Amplifiers	AVIC
871	Transistor Oscillators	AVIC

872	Specialized Electronic Devices	AVIC
873	Operational Amplifiers Unit 1	AVIC
874	Operational Amplifiers Unit 2	AVIC
876	Using Electronic Test Equip 1	AVIC
877	Using Electronic Test Equip 2	AVIC
878	Using Electronic Test Equip 3	AVIC
879	Cable and Wire Terminations	AVIC
880	Circuit Board Repair	AVIC

## ELECTRICAL POWER PRODUCTION

<u>Test No</u>	<u>Tape Title</u>	<u>Source</u>
----------------	-------------------	---------------

### CE GENERAL

819	Hand Tools I	AVIC
820	Hand Tools 2	AVIC
821	Measurement Tools 1	AVIC
822	Measurement Tools 2	AVIC
823	Power Tools	AVIC
838	Fire Safety	AVIC
839	Hazardous Substances	AVIC
185	Mobile Aircraft Arresting System	AFAV
734	Power Generation	AVIC
753	Batteries, Generators, and Motors	AVIC
754	Transformer Control Mechanisms	AVIC
787	Power Generation Principles	AVIC
788	Power Generation AC Power	AVIC
790	Generator Operations	AVIC
791	Reading Electrical Diagrams	AVIC
792	Three Phase Power	AVIC
793	Unit Transform, SwYds, and Substs	AVIC
794	Station Service Systems	AVIC
795	Fundamentals of Plant Protection	AVIC
796	Electrical Protection	AVIC
805	Basic Bearings	AVIC
806	Basic Lubrication	AVIC

### LOW VOLTAGE

751	Fundamentals of Electricity 1	AVIC
752	Fundamentals of Electricity 2	AVIC
897	DC Fundamentals Review	AVIC
899	Electromagnetic Induction Review	AVIC
900	Safety in Electrical Maintenance	AVIC
901	Using Electrical Test Equipment	AVIC
902	Reading Electrical Diagrams 1	AVIC
903	Reading Electrical Diagrams 2	AVIC
904	Troubleshooting & Emergency Repair of DC Systems & Equip	AVIC
905	Troubleshooting & Emergency Repair of AC Systems & Equip	AVIC
906	AC Generators Maintenance	AVIC
907	DC Generators Maintenance	AVIC
908	DC Motor Maintenance	AVIC
909	DC Motor Controller Maintenance I	AVIC
910	DC Motor Controller Maintenance 2	AVIC
911	Single Phase AC Motor Maintenance	AVIC
912	Three Phase AC Motor Maintenance	AVIC
913	AC Motor Controller Maintenance 1	AVIC
914	AC Motor Controller Maintenance 2	AVIC
916	Motor Branch Circuit Protection	AVIC
918	Maintenance of Low Voltage Circuit Breakers and Switchgear	AVIC
920	Storage Batteries and Chargers	AVIC
921	Cable/Condtr/Splices/Termination 1	AVIC
922	Cable/Condtr/Splices/Termination 2	AVIC

### ELECTRONICS

866	Basic Electronics Unit 1	AVIC
867	Basic Electronics Unit 2	AVIC

### CONTINGENCY

203	Field Sanitation & Hygiene	AFAV
204	Desert Survival	AFAV
205	Cold Weather Survival	AFAV
206	Explosive Ordnance Reconnaissance	AFAV
210	Resource Dispersal	AFAV
212	RRR Philosophy	AFAV
214	Base Denial	AFAV
257	Spall Repair	AFAV

264	Command and Control	AFAV
267	Auxiliary Firefighting	AFAV

#### SUPPLEMENTAL TRAINING - supplements STS/OJT training requirements

##### CE GENERAL

728	Powers, Root, and Mathematics	AVIC
729	Algebra and Formulas	AVIC
730	Algebra and Graphs	AVIC
731	Fundamentals of Math	AVIC
732	Using Formulas	AVIC
733	Graphs, Charts, and Tables	AVIC
951	Common Home Repairs	HT*
952	Contracting a Home I	HT
953	Contracting a Home 2	HT
954	Home Evaluation	HT
955	Preventative Home Maintenance	HT

##### ELECTRONICS

868	Power Supplies	AVIC
869	Transistor Principles	AVIC
870	Transistor Amplifiers	AVIC
871	Transistor Oscillators	AVIC
872	Specialized Electronic Devices	AVIC
873	Operational Amplifiers Unit 1	AVIC
874	Operational Amplifiers Unit 2	AVIC
876	Using Electronic Test Equip 1	AVIC
877	Using Electronic Test Equip 2	AVIC
878	Using Electronic Test Equip 3	AVIC
879	Cable and Wire Terminations	AVIC
880	Circuit Board Repair	AVIC

## HEATING, VENTILATION, AIR CONDITIONING & REFRIGERATION(HVAC/R)

Test No	Tape Title	Source
---------	------------	--------

## CE GENERAL

819	Hand Tools 1	AVIC
820	Hand Tools 2	AVIC
821	Measurement Tools 1	AVIC
822	Measurement Tools 2	AVIC
823	Power Tools	AVIC
838	Fire Safety	AVIC
839	Hazardous Substances	AVIC

## LOW VOLTAGE

751	Fundamentals of Electricity I	AVIC
752	Fundamentals of Electricity 2	AVIC
900	Safety in Electrical Maintenance	AVIC
901	Using Electrical Test Equipment	AVIC
902	Reading Electrical Diagrams 1	AVIC
903	Reading Electrical Diagrams 2	AVIC
911	Single Phase AC Motor Maintenance	AVIC
912	Three Phase AC Motor Maintenance	AVIC

## ELECTRONICS

866	Basic Electronics Unit 1	AVIC
867	Basic Electronics Unit 2	AVIC

## HEATING

805	Basic Bearings	AVIC
806	Basic Lubrication	AVIC
807	Roller Contact Bearings 1	AVIC
808	Roller Contact Bearings 2	AVIC
809	Sliding Surface Bearings 1	AVIC
810	Sliding Surface Bearings 2	AVIC
817	Cutting Tools	AVIC
818	Gaskets, Packing, Mech Seals	AVIC
824	Resurfacing Techniques	AVIC
825	Gauge Glass Maintenance	AVIC
826	Heat Exchangers 1	AVIC

827	Heat Exchangers 2	AVIC
829	Print Reading and Use	AVIC
830	Pipe and Pipe Fitting	AVIC
831	Safety Valves 1	AVIC
832	Safety Valves 2	AVIC
833	Valve Maintenance I	AVIC
834	Valve Maintenance 2	AVIC
835	Piping Auxiliaries	AVIC
836	Steam Traps	AVIC
837	Thermal Installation	AVIC
842	Centrifugal Pumps 1	AVIC
843	Centrifugal Pumps 2	AVIC

#### REFRIGERATION

107	Refrigeration Fundamentals	AFAV
108	Vapor Compression Cycle Components	AFAV
109	Condenser and Cooling Towers	AFAV
110	Evaporators	AFAV
111	Chillers	AFAV
113	Heat Pumps	AFAV
114	Refrigeration Piping	AFAV
115	Refrigeration Controls	AFAV
116	Capacity Testing	AFAV
117	Low Temperature Refrigeration	AFAV
118	Special Applications	AFAV
803	Air Compressors 1	AVIC
804	Air Compressors 2	AVIC

#### CONTROLS

850	Pressure & Pressure Measurement	AVIC
851	Pressure Gauges & Calibration 1	AVIC
852	Pressure Gauges & Calibration 2	AVIC
854	Liquid Level Measurements 1	AVIC
855	Liquid Level Measurements 2	AVIC
856	Fluid Flow Measurements 1	AVIC
857	Fluid Flow Measurements 2	AVIC
858	Temperature & Temp Measurements 1	AVIC
859	Temperature & Temp Measurements 2	AVIC
860	Actuators	AVIC

861	Recorders	AVIC
862	Basic Process Control Unit 1	AVIC
863	Basic Process Control Unit 2	AVIC
864	Basic Control Loops	AVIC
865	Troubleshooting and Repair	AVIC
881	Electronic Control Systems 1	AVIC
882	Electronic Control Systems 2	AVIC
883	Electronic Control Systems 3	AVIC
884	Electronic Control Diagrams	AVIC
885	Basic Pneumatic Systems/Diagrams	AVIC

## WATER TREATMENT

### BASIC WATER & CHEMISTRY

759	Chemistry Concepts	AVIC
760	Water Chemistry Fundamentals	AVIC
761	Elementary Water Treatments	AVIC
762	Water Chemistry Applications	AVIC

### WATER TREATMENT EQUIPMENT

771	Boiler Water Treatment	AVIC
772	Raw Water Treatment	AVIC
773	Ion Exchange	AVIC
774	Cooling Water Treatment	AVIC

## OXY NON-FUSION

630	Basic Nomenclature	TPC
631	Prepping the Unit for Welding	TPC
632	Light & Adjust Welding Flame	TPC
633	Basic Application	TPC
634	Varying Applications	TPC

## OXYACET CUTTING

635	Setting up the Equipment	TPC
636	Specialized Oxyacet Cutting	TPC

## CONTINGENCY

203	Field Sanitation & Hygiene	AFAV
-----	----------------------------	------

204	Desert Survival	AFAV
205	Cold Weather Survival	AFAV
206	Explosive Ordnance Reconnaissance	AFAV
210	Resource Dispersal	AFAV
212	RRR Philosophy	AFAV
214	Base Denial	AFAV
257	Spall Repair	AFAV
264	Command and Control	AFAV
267	Auxiliary Firefighting	AFAV

#### SUPPLEMENTAL TRAINING - supplements STS/OJT training requirements

##### CE GENERAL

728	Powers, Root, and Mathematics	AVIC
729	Algebra and Formulas	AVIC
730	Algebra and Graphs	AVIC
731	Fundamentals of Math	AVIC
732	Using Formulas	AVIC
733	Graphs, Charts, and Tables	AVIC
951	Common Home Repairs	HT
952	Contracting a Home 1	HT
953	Contracting a Home 2	HT
954	Home Evaluation	HT
955	Preventative Home Maintenance	HT

##### LOW VOLTAGE

913	AC Motor Controller Maintenance 1	AVIC
-----	-----------------------------------	------

##### ELECTRONICS

868	Power Supplies	AVIC
869	Transistor Principles	AVIC
870	Transistor Amplifiers	AVIC
871	Transistor Oscillators	AVIC
872	Specialized Electronic Devices	AVIC
873	Operational Amplifiers unit 1	AVIC
874	Operational Amplifiers unit 2	AVIC
876	Using Electronic Test Equip 1	AVIC
877	Using Electronic Test Equip 2	AVIC

464	Soil Fundamentals and Stabilization 2	AFAV
465	Soil Fundamentals and Stabilization 3	AFAV
466	New Technology	AFAV
467	Pavement Management System 1	AFAV
468	Pavement Management System 2	AFAV
469	Pavement Management System 3	AFAV
470	Pavement Management System 4	AFAV

#### CONTINGENCY

203	Field Sanitation & Hygiene	AFAV
204	Desert Survival	AFAV
205	Cold Weather Survival	AFAV
206	Explosive Ordnance Reconnaissance	AFAV
210	Resource Dispersal	AFAV
212	RRR Philosophy	AFAV
214	Base Denial	AFAV
257	Spall Repair	AFAV
264	Command and Control	AFAV
267	Auxiliary Firefighting	AFAV

#### SUPPLEMENTAL TRAINING - Supplements STS/OJT training requirements

728	Powers, Root, and Mathematics	AVIC
729	Algebra and Formulas	AVIC
730	Algebra and Graphs	AVIC
731	Fundamentals of Math	AVIC
732	Using Formulas	AVIC
733	Graphs, Charts, and Tables	AVIC
823	Power Tools	AVIC
951	Common Home Repairs	HT
952	Contracting a Home 1	HT
953	Contracting a Home 2	HT
954	Home Evaluation	HT
955	Preventative Home Maintenance	HT

#### BASIC ARC WELDING

625	Introduction to Arc Welding	TPC
626	Protective Devices and Clothing	TPC

409	Finishing A Basement	HT
410	Framing	HT
411	Hand & Power Tools	HT
412	Home Security	HT
413	Lighting	HT
415	Patios & Walkways	HT

421	Windows & Doors	HT
422	Wood Flooring	HT

#### BASIC MASONRY

425	Spreading Mortar	TPC
426	The Pyramid	TPC
427	Building a Corner	TPC
428	Wall Construction 1	TPC
429	Wall Construction 2	TPC

#### SHEET METAL

600	Introduction and Overview	TPC
601	Straight Line Pattern Development	TPC
602	Par & Rad Line Pattern Development	TPC
603	Cutting Methods	TPC
604	Drill, Form, and Bending 1	TPC
605	Drill, Form, and Bending 2	TPC
606	Assembly and Fastening	TPC

#### BASIC ARC WELDING

625	Introduction to Arc Welding	TPC
626	Protective Devices and Clothing	TPC
627	Striking the Arc	TPC
628	Running the Bead	TPC
629	Weaving the Bead	TPC

#### OXY NON-FUSION

630	Basic Nomenclature	TPC
-----	--------------------	-----

631	Prepping the Unit for Welding	TPC
632	Light & Adjust Welding Flame	TPC
633	Basic Application	TPC
634	Varying Applications	TPC

#### OXYACET CUTTING

635	Setting up the Equipment	TPC
636	Specialized Oxyacet Cutting	TPC

#### CONTINGENCY

203	Field Sanitation & Hygiene	AFAV
204	Desert Survival	AFAV
205	Cold Weather Survival	AFAV
206	Explosive Ordnance Reconnaissance	AFAV
210	Resource Dispersal	AFAV
212	RRR Philosophy	AFAV
214	Base Denial	AFAV
257	Spall Repair	AFAV
264	Command and Control	AFAV
267	Auxiliary Firefighting	AFAV

#### SUPPLEMENTAL TRAINING - supplements STS/OJT training requirements

728	Power, Roots, and Mathematics	AVIC
729	Algebra and Formulas	AVIC
730	Algebra and Graphs	AVIC
731	Fundamentals of Math	AVIC
733	Graphs, Charts, and Tables	AVIC
900	Safety in Electrical Maintenance	AVIC
901	Using Electrical Test Equip	AVIC
902	Reading Electrical Diagrams I	AVIC
952	Contracting a Home 1	HT
953	Contracting a Home 2	HT
954	Home Evaluation	HT
955	Preventative Home Maintenance	HT

205	Cold Weather Survival	FAV
206	Explosive Ordnance Reconnaissance	FAV
210	Resource Dispersal	FAV
212	RRR Philosophy	FAV
214	Base Denial	FAV
257	Spall Repair	FAV
264	Command and Control	FAV
267	Auxiliary Firefighting	FAV

## SUPPLEMENTAL TRAINING - supplements STS/OJT training requirements

### CE GENERAL

728	Powers, Root, and Mathematics	AVIC
729	Algebra and Formulas	AVIC
730	Algebra and Graphs	AVIC
731	Fundamentals of Math	AVIC
732	Using Formulas	AVIC
733	Graphs, Charts, and Tables	AVIC
866	Basic Electronics Unit 1	AVIC
876	Using Electronic Test Equipment	AVIC
913	AC Motor Controller Maintenance 1	AVIC
914	AC Motor Controller Maintenance 2	AVIC
951	Common Home Repairs	HT
952	Contracting a Home 1	HT
953	Contracting a Home 2	HT
954	Home Evaluation	HT
955	Preventative Home Maintenance	HT

### BASIC ARC WELDING

625	Introduction to Arc Welding	TPC
626	Protective Devices and Clothing	TPC
627	Striking the Arc	TPC
628	Running the Bead	TPC
629	Weaving the Bead	TPC

OXY NON-FUSION

630	Basic Nomenclature	TPC
631	Prepping the Unit for Welding	TPC
632	Light & Adjust Welding Flame	TPC
633	Basic Application	TPC
634	Varying Applications	TPC

## OXYACET CUTTING

635	Setting up the Equipment	TPC
636	Specialized Oxyacet Cutting	TPC

# ENGINEERING

## CORE TRAINING

<u>Test No</u>	<u>Tape Title</u>	<u>Source</u>
----------------	-------------------	---------------

CE GENERAL

819	Hand Tools 1	AVIC
820	Hand Tools 2	AVIC
821	Measurement Tools 1	AVIC
822	Measurement Tools 2	AVIC
823	Power Tools	AVIC
838	Fire Safety	AVIC
839	Hazardous Substances	AVIC

## CONTINGENCY

203	Field Sanitation & Hygiene	AFAV
204	Desert Survival	AFAV
205	Cold Weather Survival	AFAV
206	Explosive Ordnance Reconnaissance	AFAV
210	Resource Dispersal	AFAV
212	RRR Philosophy	AFAV
214	Base Denial	AFAV
257	Spall Repair	AFAV

264	Command and Control	AFAV
267	Auxiliary Firefighting	AFAV
